

Newtral AI Overview

AI-powered Sustainability Software for Corporates and
Value Chain Partners

Newtral AI Platform

Current Sustainability Landscape and Business Challenges

SEBI mandated BRSR Reporting (ESG) for top 1000 companies ^[1]

Impact: Businesses are investing in technology to streamline their reporting workflow and build capabilities for sustainability reporting

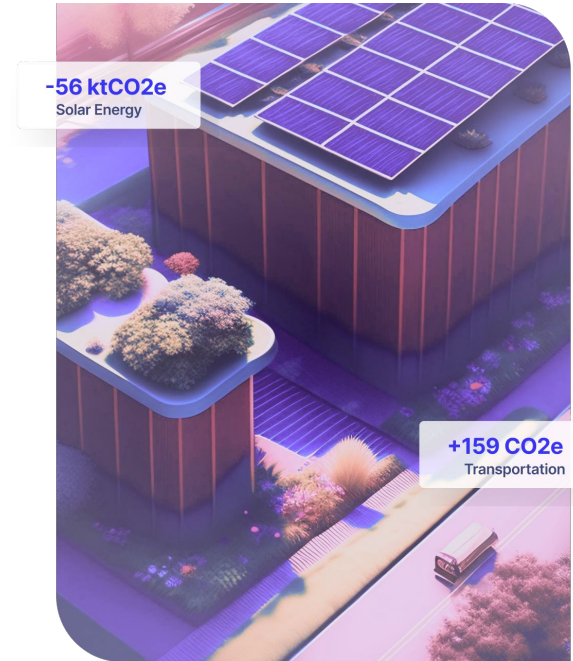

EU started CBAM to control 'carbon leakage', starting from Oct 1, 2023 ^[2]

Impact: Indian export companies will need to disclose their carbon footprint, while exporting to EU. Indian companies with larger footprint will also see reduction in profit margin due additional sustainability compliance

India to launch its own carbon credit scheme and market (reference) ^[3]

Impact: Opportunities for Indian companies to participate in the credit market, need support and guidance around how to start their sustainability journey

Newtral AI for Corporates

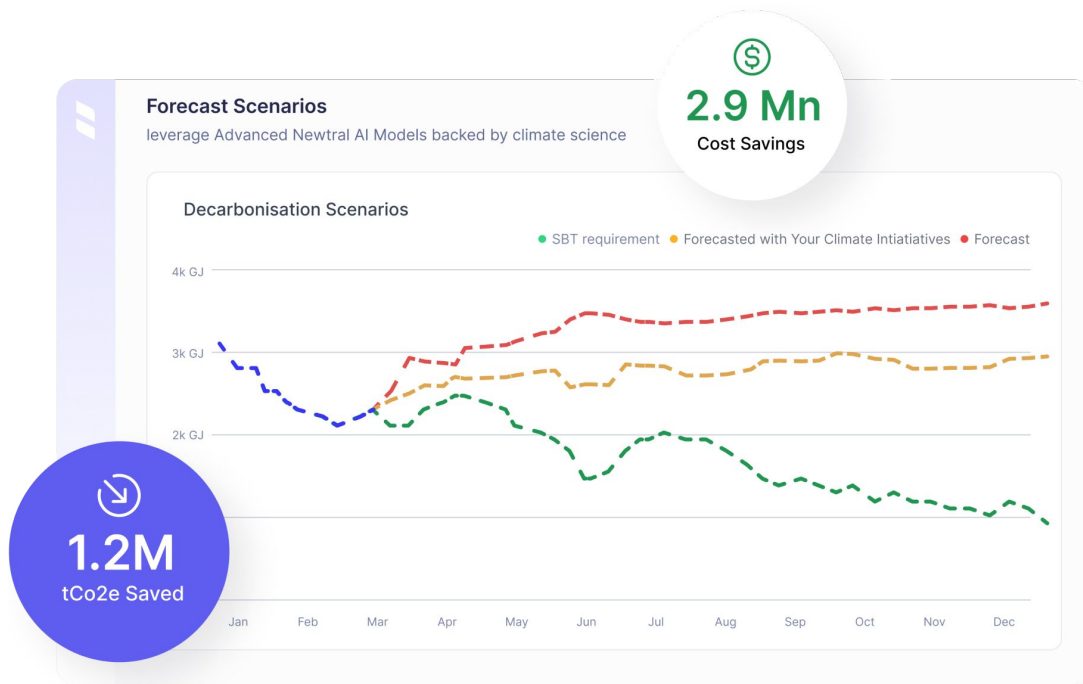

Comprehensive software for Business ESG needs

AI-powered Workflows for GHG accounting, Sustainability Reporting, Target Setting and Decarbonisation

Track and Reduce Value Chain Emissions

Automate ESG Reporting Compliances with embedded knowledge of BRSR, ESRS, GHG, ISO 14064

Improve ESG Score by Peer Benchmarking and Gap Analysis

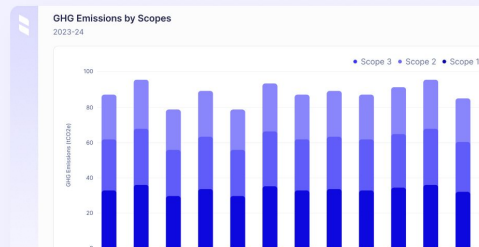

Digitise ESG Management

Embrace the digital revolution in ESG management with Newtral. Our AI-powered platform streamlines initiatives, making data collection, analysis, and reporting seamless. Experience sustainable business management with Newtral.

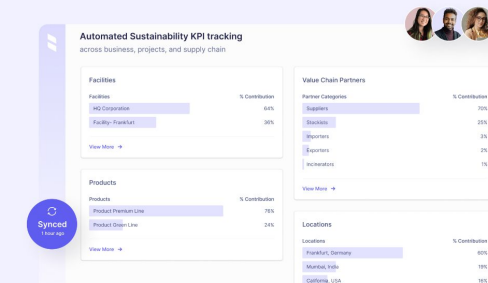

Measure GHG Emissions across Scope 1, 2 and 3 Categories

Track and manage GHG emissions across Scope 1, 2, and 3 categories with precision and ease using Newtral's comprehensive measurement tools.

ESG Analytics at Facility, Product and Category Level

Gain actionable insights into ESG performance at facility, product, and category levels with Newtral's advanced analytics capabilities.

Automate ESG Data Collection across 20+ Categories

Streamline ESG data collection across more than 20 categories, saving time and ensuring data accuracy with Newtral's automated solutions.

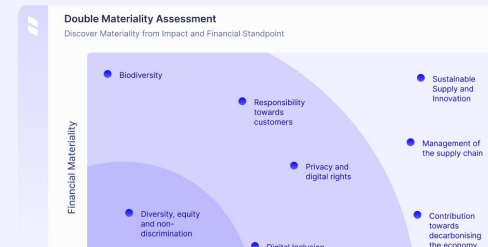

Integrations

Seamlessly integrate Newtral with your existing systems and tools to streamline workflows and maximize efficiency in ESG management.

Materiality and Double Materiality Assessment

Conduct materiality and double materiality assessments seamlessly to prioritize ESG issues and align with stakeholder expectations effectively.

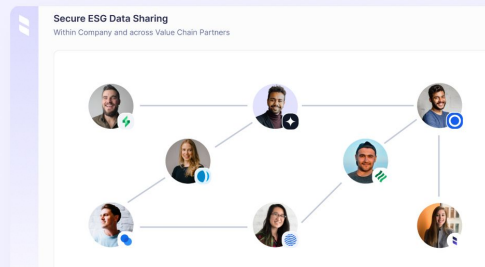

Decarbonise Value Chain

Transform into a sustainability leader by decarbonizing your value chain with Newtral. Identify emissions hotspots and drive positive environmental impact efficiently.

Measure and Track Value Chain Emissions and ESG Metrics in real-time

Monitor and manage value chain emissions and ESG metrics in real-time with Newtral's advanced tracking capabilities.

Manage Value Chain Partners Data at Scale

Effortlessly manage data from value chain partners at scale, ensuring comprehensive insights and collaboration for decarbonization efforts.

Automate Value Chain Disclosures

Automate the disclosure process for value chain emissions and sustainability efforts, ensuring transparency and compliance effortlessly.

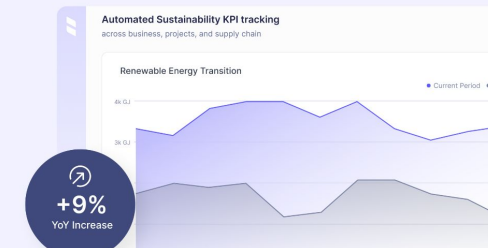

AI-enabled Forecasting of Decarbonisation Scenarios

Utilize AI for accurate forecasting of decarbonization scenarios, empowering informed decision-making and strategic planning.

Set Science-based Targets, KPIs and Initiatives for Decarbonisation

Define science-based targets, KPIs, and initiatives tailored for decarbonization, driving measurable progress towards sustainability goals.

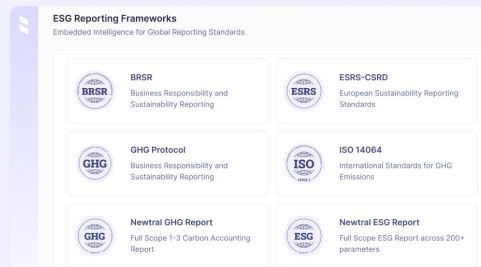

Automate ESG Reporting across Multiple Frameworks

Streamline ESG reporting across frameworks effortlessly. Consolidate data and generate comprehensive reports with Newtral, ensuring compliance and transparency.

Embedded Intelligence for Global ESG Reporting Frameworks

Harness the power of embedded intelligence to navigate diverse ESG reporting frameworks effortlessly.

Collaborate with teams

Streamline collaboration across teams for seamless ESG reporting and data sharing.

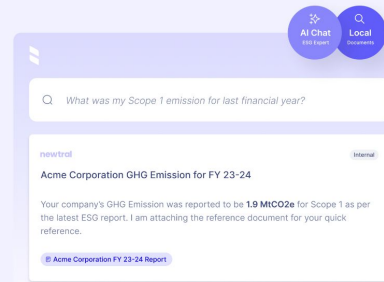

Benchmark Reports with Peers and Industry Leaders

Benchmark your ESG reports against peers and industry leaders to drive continuous improvement and stay ahead of the curve.

AI-assisted Report Preparation with Newtral Co-pilot

Let Newtral Co-pilot assist you in preparing ESG reports with AI-driven insights and recommendations.

Improve Accuracy with AI-enabled Data Anomaly Detection and Recommendations

Enhance data accuracy with AI-powered anomaly detection and actionable recommendations.

Newtral AI for Value Chain Partners

Comprehensive software for all your ESG needs
of Value Chain Partners

Streamlined Value Chain Partner Workflow powered by Newtral Platform -

Scales the ability to survey, enable, collect
commitments, and track progress

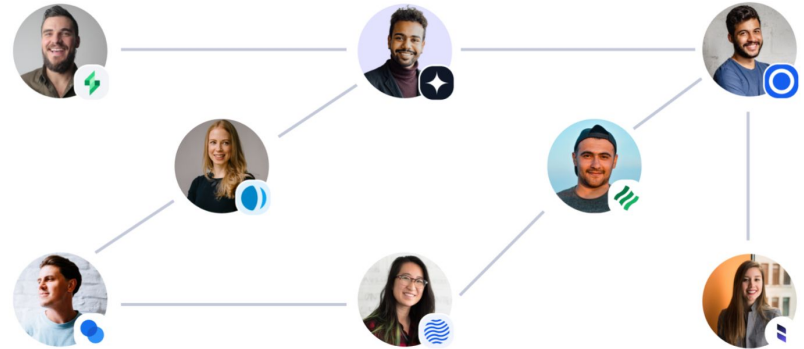

Improved Supplier ESG Risk Rating

Value Chain Partner performance
contribution to Net Zero Goals

Implementation Roadmap for Value
Chain Partner

Secure ESG Data Sharing

Within Company and across Value Chain Partners

Automate ESG Data Sharing with Clients

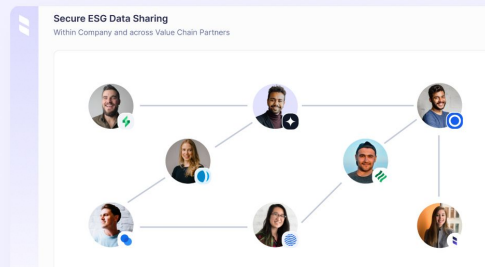

Streamline ESG data sharing with clients to demonstrate your commitment to sustainability and foster collaborative partnerships within your value chain community.

Companies can invite all of the value chain partners on their platform **without added cost to company or partner**, save 1200+ hours of manual work for ESG data collection.

Dedicated person for seamless onboarding of partners and data collection

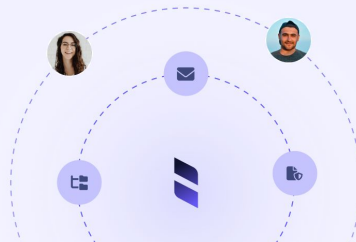

Automated ESG Data Sharing with Multiple Clients at Scale

Effortlessly share ESG data with multiple clients at scale, enhancing transparency and collaboration across your supply chain.

Manage all your Client's ESG Communication in one place

Centralize and streamline ESG communication with all your clients in one convenient platform, ensuring consistency and efficiency.

Integrations

Seamlessly integrate Newtral AI for supply chain with your existing systems and tools for enhanced workflow efficiency.

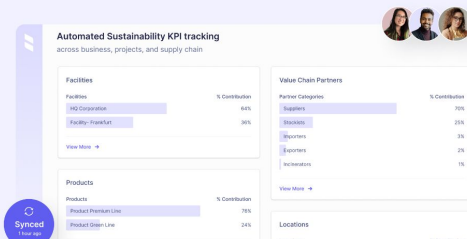

AI-powered Data Audits

Harness the power of AI for automated data audits, ensuring accuracy and reliability in your ESG reporting and communication.

Measure ESG Metrics at Client Level, Product Level and Facility Level

Gain granular insights into ESG performance at client, product, and facility levels, empowering informed decision-making and targeted improvements.

Robust Data Security and Quality Certifications

Newtral AI Platform is
GDPR ready

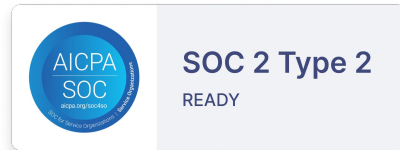

Compliant with 27001,
9001:2015, 14001

Data hosting globally present in
US, Europe and India amongst
other geographies

We use Global best-in-class tech
infrastructure including MongoDB,
AWS (Amazon Web Services) & MS
Azure Cloud Services

DRATA

Partnering with Drata, Global Leader in
Enterprise Data Security Compliance for
SOC 2 Type 2 Compliance. Following
Global best practices on Newtral AI
